

BECOME A TREE DETECTIVE

Discovering amazing plants and animals is one of the best things about camping. Look around at all these living things! There are lots of trees! They help shade you from the sun and block the wind.

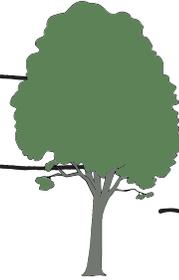

Print out the following pages and explore your surroundings. Compare your sketches and rubbings from the different trees that you find.

BECOME A TREE DETECTIVE

DECIDUOUS TREE

Maple trees are a kind of deciduous tree. Our leaves change colour and fall off in autumn!

Make a rubbing of the bark of a deciduous tree.

Draw the leaves of a deciduous tree.

What kind of tree is this?

BECOME A TREE DETECTIVE

CONIFEROUS TREE

Pine trees are a kind of coniferous tree. Our needles stay green all year long.

Make a rubbing of the bark of a coniferous tree.

Draw the needles or cones of a coniferous tree.
